Subject: Microsoft Settlement

As a user of Microsoft products over the years I am very disappointed in DOJ's actions against Microsoft and the \$35 Million it spent to cripple the IT industry. Although I do not agree with some provisions of the settlement I find the fact of the settlement and resulting closure to be better for the economy than further harassment of MS and its chilling effect on entrepreneurial spirit. Let's get on with the task of building a better world through information technology. DOJ owes Microsoft an apology that will never be issued but let's not drag them any further from doing what they do best....creating the best software/systems in the world.
